Cancer, The Program (part 2)

08/02/10

It is said that with cancer in the best strategy is prevention! The truth is, according to Boyd a famous pathologist, the body is in and out of a cancerous state 40 times each day. There is function of the normal body that is able to identify and control the development of cancer on a cellular level. When this function stops working there is the possibility of developing a focus of cancer called a tumor. A tumor is a much more difficult challenge for the body to resolve, than the singular cancer cell. Caring for foundational issues in cancer with a holistic program is best done as complement alongside medical therapies.

1. Treat the whole person – reduce risk factors
