Digestive Potency

Fuel absorption, waste removal, Immune modulation

07/28/09, 03/21/11

- The digestive tract immune system is often referred to as **gut-associated lymphoid tissue (GALT)** and works to protect the body from invasion. GALT is an example of mucosa-associated lymphoid tissue.
- About 70% of the body's immune system is found in the digestive tract. The GALT is made up of several types of lymphoid tissue that store immune cells, such as T and B lymphocytes, that carry out attacks and defend against pathogens.
